New Security Advisory - VMSA-2021-0020

Updated on September 21, 2021

Critical security vulnerabilities have been identified in some versions of VMware vCenter Server. VMware recommends patching the systems as soon as possible.

CLICK HERE FOR MORE DETAILS ON THIS ADVISORY.

For additional support for this issue, please check [VMware Communities](#) talk to experts, or read the [VMSA-2021-0020 KB article](#).
